Subject: Re: Dimmock Data

ok. Have a good weekend. I have spoken to both Rich Rupert and Gary Newhart.

I am creating a web page for us to use on OSC.net. You will get an email on that. It will be exclusive and only for the group of us. All of us will have rights to add stuff, etc.

Rich

Subject: Dimmock Data

I down loaded the data to my lap top from the web site. I probably will not be able to get through looking at the data until after the weekend (have family stuff going on) but I am having my POV fixed in Delaware on Monday (compressed day) and will have plenty of time while waiting to look at it.

Also will review the Pavilion draft report but it hit the headlines today:

"EPA's conclusions are not based on sound science but rather on political science," Sen. James Inhofe, R-Okla, said in a statement. "Its findings are premature, given that the agency has not gone through the necessary peer-review process, and there are still serious outstanding questions regarding EPA's data and methodology."

This announcement is part of President Obama's war on fossil fuels and his determination to shut down natural gas production," added Inhofe, the senior Republican on the Senate Committee on Environment and Public Works.

Interesting.....
